CSS

---

Full-stack web developer with a passion for problem-solving and innovation and a diverse background in troubleshooting, engineering and radio production.

---

## EXPERIENCE

### General Assembly

March 2018-present

#### *Web Development Immersive*

- Completed a 12-week, 600+ hour immersive web development program in which I developed four full-stack web apps utilizing industry-best practices
- **Tic Tac Toe (LINK):** The first of the four projects, I learned the X's and O's of front-end web development by building a single-page app that allows players to play tic tac toe locally.
- **GameRoster (LINK):** My first full-stack app built using Rails back-end API and a front-end web client, GameRoster is a library that allows users to take a full inventory of their video game collection.
- **Project 3 (LINK):** I think the description of every project should be one sentence that takes up about four lines and is a brief and concise description of what the app does and how it was built.
- **Project 4 (LINK):** I think the description of every project should be one sentence that takes up about four lines and is a brief and concise description of what the app does and how it was built.

### Entercom Boston

Jan. 2009-Feb. 2018

#### *Executive Producer, Red Sox Radio*

- Operated as executive producer with a five-person team to produce 175+ live game broadcasts aired over 60+ stations
- Troubleshot technical issues on the front and back end of the broadcast prior to and during live baseball games
- Created and continually updated broadcast format
